703

out of 703 listings (100%)

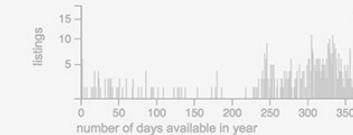

Availability

Only highly available

An Airbnb host can setup a calendar for their listing so that it is only available for a few days or weeks a year.

Other listings are available all year round (except for when it is already booked).

Entire homes or apartments **highly available** year-round for tourists, probably don't have the owner present, could be illegal, and more importantly, are displacing residents.

Only multi-listings

Some Airbnb hosts have multiple listings.

A host may list separate rooms in the same apartment, or multiple apartments or homes available in their entirety.

Hosts with multiple listings are more likely to be running a business and could be doing so without a license or paying taxes.

Laurie Anne Emma
Director of Research

Laurie Anne, who joined the firm in 2000, is involved in all phases of the search process, providing research on traditional and alternative investment management firms, personnel movement, market/performance data, and industry developments. She also prepares the consultants for business development meetings and assists with establishing a search plan and strategy at the beginning of each new assignment.

Prior to joining Higdon Partners, Laurie Anne served for six years as a real estate paralegal with several New York law firms, including Wilkie, Farr & Gallagher, and has experience in the fields of social work and education. She is a cum laude graduate of Stephen F. Austin State University (TX), earning her B.A. degree in both English and Sociology.

Why Higdon Partners

Asset Management Industry: Higdon Partners has been involved in many large mergers, takeovers and acquisitions in the asset management industry. We provide executive search services to clients in areas such as hedge funds, pension funds, mutual funds, foundations, endowments, and other investment management firms. We have extensive experience in the search for chief investment officers, chief financial officers, chief operating officers, and other senior management positions.

Retirement Benefits

Our firm was established in 1986 in New York, and has concentrated exclusively on the asset management industry ever since. We have a strong track record of success in finding the right candidates for our clients. We have a deep understanding of the needs of our clients and their customers, and we are committed to providing the best service possible.

Why We're Different

We believe that our success is due to our ability to identify the right person for the job. Search consultants at Higdon Partners have a unique combination of skills and experience that allows them to evaluate the needs of the client and identify the right person for the job. Search consultants at Higdon Partners have a unique combination of skills and experience that allows them to evaluate the needs of the client and identify the right person for the job.

Known by the Company We Represent

The firm prides itself on providing quality of service and results. It has had a positive impact on the industry, and it continues to do so. We are committed to providing the best service possible.

Our Services

We offer a wide range of services, including executive search, succession planning, and strategic consulting.

Our Locations

We have offices in New York and Charlotte, NC.

Our Clients

We represent a variety of clients, including pension funds, mutual funds, hedge funds, and other investment management firms.

Our Staff

We have a dedicated team of professionals who are experts in their respective fields.

color modes

projected color
reflected color
color modes comparison

Color is generated in one of two ways: an object either reflects it or radiates it.

Objects such as desks and computers are called nonluminous, because they are illuminated by the light they reflect. Surfaces such as the screens you are viewing are called luminous, because they project their own light. Thus the need to distinguish between reflected (subtractive) color and projected (additive) color.

The painters referred to as the Impressionists, including Monet, Renoir, Degas, and Manet, also sought to achieve an illusory optical effect. Like Seurat, they focused more on capturing the immediate visual impression of reflected light than on the actual representative colors of an observed object. Rather than mix colors on their palettes, they applied uncolored paint to the canvas in small, the colors blended in the viewer's eye.

Many post-impressionist artists added more structure and emotion to paintings, and thereby power to the current of expressionism in art.

Paul Cézanne is often described as the father of modern art; giants such as Picasso and Matisse greatly admired his innovative use of perspective, composition, and especially color.

Dutch painter Vincent Van Gogh used swirling, contoured brushwork to apply striking colors to convey an oft-anguished mental state: "Instead of trying to render things I see before me, I use color in an arbitrary way to express myself."

The color wheel illustrates the relationships among the colors in the visible spectrum.

Primary colors mix to form all other colors.

Secondary colors are mixtures of two primaries.

Tertiary colors are made up of a primary and a secondary color.

Complementary colors have the most contrast.

Analogous colors are adjacent to each other, and thus share the same undertones.

Incongruous colors are discordant color pairs.

Triad Harmony involves any three hues equally spaced on the color wheel.

dreamy

The Fauvist movement included Henri Matisse, Maurice de Vlaminck, and André Derain. Their love of uninhibited color and disregard for natural forms has come to be recognized as one of the major early forces which drive modern art.

In the early 20th century, a small band of artists called the Fauves carried Van Gogh's exploration further by translating their feelings into a brawny, vibrant style. Enraptured with an emotional force, the Fauves experimented with radical new styles in which colors lost representational qualities and became pure sensations. The Fauves shunned detail, favoring bold and robust strokes to convey meaning.

Some of the first art to move beyond pictorial toward pure form sought a spiritual through explorations of form and color.

Kandinsky became focused in his work on a universal harmony. His increasingly abstract compositions evolved into color and studies in which placing one dominant color against another creates movement yet equilibrium.

Expressionist Wassily Kandinsky felt that because every color held its own expressional value, art could more effectively communicate meaning through abstract form and color than by literal depiction of observed subjects.

Color Game 1: Middle Mixture
The middle mixture is equivalent to either of its parent colors. Drag a diamond to find the color which creates the most convincing blend.

PROJECTS / Multi-family / Trump Plaza, Jersey City, NJ

Trump Plaza Jersey City, NJ 2007

1 of 8

Topping out at 55 floors, Trump Plaza is the tallest residential building in New Jersey. A second 30-story tower will result in a total of 862 apartments. A striking combination of buff and white brick, with a white crown that extends down the east and west sides, emphasizes the building's slenderness and height.

Peter DeWitt AIA
PARTNER

A 1976 graduate of University of Pennsylvania Graduate School of Fine Arts, Peter DeWitt has practiced architecture in New York for over 30 years. Early in his career Mr. DeWitt spent eleven years at Beyer Blinder Belle, becoming a partner in the firm in 1988. While at Beyer Blinder Belle, he directed the critically acclaimed design of the Temple Hoyne Buell Theater at the Denver Arts Center and a library and atrium gallery for the Japan Society in Manhattan. While at 609 Mr. DeWitt designed the architectural component of the first Barnes Women's Store at 17th Street and Seventh Avenue in New York, where his distinctive sweeping stair created an exciting shopping scene in the 1980's. Other design work included the retail component of the Museum Block at the acclaimed South Street Seaport, and a new lobby and exterior facade in the style of the neighboring Rockefeller Center at 609 Fifth Avenue.

Completed large-scale projects include the design of the 333 River Street, a 525-unit residential building in Hoboken, New Jersey, the Gotham, a 220-unit building in Jersey City, the Constitution, a 325-unit residential and retail complex in Hoboken, Chancery Square, a 135-unit building in the downtown historic district of Morristown, New Jersey as well as Hudson Square South, a 150-unit residential building also in Hoboken. The New York City Landmarks Preservation Commission commended Mr. DeWitt's design for a new 25-unit loft building in the Tribeca historic district, completed in 2000. Current projects include Trump Plaza, a pair of 55-story residential towers in Jersey City, and three neighboring 12-story buildings for Toll Brothers in Hoboken. Smaller scale work includes numerous private residences and estates including the AIA Award-winning North Castle Farms, and homes in Aspen, Colorado, East Hampton, New York, and Short Hills, New Jersey.

Asia Pacific

Equities

Asia's economic dynamism has led to increasing global demand for resources and labour, driving robust growth trends. However, the region's economic development is far from uniform, with the rich and the poor still separated by huge wealth gaps.

Fixed Income

Since the financial crisis, the world's bond market has been dominated by the US dollar. Asian bonds are also finding a following, as are those of other emerging markets. Bond yields remain at historic lows.

Medium-Term Investments

Oil & Energy. Demand for oil and gas continues to grow, driven by the fast-growing economies of China and India. Oil prices have been volatile, fluctuating around \$100 per barrel, reflecting uncertainty around investment, demand and OPEC's output policy.

Long-Term Investments

Asian equities and corporate bonds can be used to grow capital. Their focus on older, more established companies makes them less volatile than stocks. Asia is an early priority given the opportunity to invest in a range of sectors. It includes infrastructure, which can benefit from the region's growing middle class. In China, growth is driven by its shift away from heavy industry towards consumer services, such as finance, retail and leisure. In India, however, economic reform has proved controversial, with inflationary pressures and political instability creating uncertainty. We recommend that investors focus on companies that are well run and resilient, with strong earnings and cash-generating ability.

Long-Term Returns

The long-term use of bonds, both domestic and international, can help diversify a portfolio. The second half of next year, which will be a year of significant geopolitical risk, may see a return to traditional asset classes, such as equities and high-grade bonds, as well as gold.

Short-Term Returns

With the exception of equities, we believe that short-term returns are likely to be limited. We expect the long-term trend for equities to continue, with the S&P 500 index rising by 5% to 7% over the next five years.

Investment Outlook

Investment in Asia Pacific is likely to be driven by the region's continued economic expansion. The region's large population and growing middle class provide a strong base for future growth. The region's diverse economy, with a mix of manufacturing, services and agriculture, also provides opportunities for investment.

Investment Strategy

We believe that the best way to invest in Asia Pacific is through a diversified portfolio of equities, bonds and other assets. This approach allows us to take advantage of the region's strengths while mitigating risks. We also believe that it is important to stay informed about the region's political and economic developments, as well as the latest research and analysis.

Conclusion

We believe that the long-term prospects for Asia Pacific are positive, despite current challenges. The region's economic growth, coupled with its large population and growing middle class, provide a strong foundation for future success. We encourage investors to consider investing in Asia Pacific, as it offers a unique opportunity to benefit from the region's rapid development and growth.
